

Dear FCC Board members, I am happy to see that the NAB feels threatened by Satellite radio, they SHOULD!!!

For years consumers have had to TAKE what local terrestrial radio stations played which was governed by corporate greed and the so called "payola" system, which aired what record company executives wanted us to hear.

Now technology comes along which allows consumers the ability to receive 100+ channels of news, weather, sports, music and traffic information from which we can choose to listen.

The NAB now wants to stifle our choices by proposing limitations to satellite content, only to further fund their member's pockets. This is the "only" reason for the NAB's complaint. The almighty dollar!

Please remain committed to further innovation and advances in satellite radio broadcasting and do not allow corporate greed from NAB members to cloud your thinking. Please REJECT NAB's Petition # 04-160!!!

Do not inhibit Satellite radio's growth because of monetary concerns from jealous NAB members. Side with consumers who FINALLY have a choice in the selection of our auditory content.

Thank you for reading my message.

Sincerely,

Joseph C. Dorsey
